SELF_ASSESSMENT_REPORT.md — template

Every submission contains this file, at the root of the zip. Score yourself against **the rubric of that assignment**, criterion by criterion.

The total you write here goes into the name of your zip: `<StudentID>_<total>.zip`, or `<StudentID1>-<StudentID2>-<StudentID3>_<total>.zip` for group work.

What to write

Self-assessment — IA#1

Submitted by: <student ID> — <full name> (group work: one line per member)

Total I claim: 78 / 100

| Criterion | Max | I claim | Evidence |

|---|---|---|---|

| Behaviour | 30 | 26 | npm test green; `qty: 1.5` throws, see test/cart.test.js:34 |

| Tests | 20 | 15 | 4 tests; no test for the free-shipping threshold |

| Harness | 20 | 16 | CLAUDE.md + npm test + lint; CI added but never ran red |

| Brief | 15 | 13 | brief.md — files, contract, "no dependencies" |

| AI-LOG.md | 15 | 8 | written after the fact, so it is thinner than it should be |

What I did not manage

The threshold case. I noticed it while writing this table, too late to add.

What I would do differently

Write the AI-LOG entry as I go. Reconstructing it at the end lost the two

places where I rejected what the assistant produced.

Rules

- **Evidence must point at something**: a file, a section, a commit, a test name. "I did this well" is not evidence.
- The section *What I did not manage* is scored as honesty, not as failure. An empty one on an imperfect submission reads worse than a frank paragraph.
- The number in the file name must equal the total in this table. If they disagree, the table wins.
- Your self-score does not set your mark — but an inaccurate one costs you. See *Honesty adjustment* below, and in the rubric of every assignment.

Honesty adjustment

Your self-assessment is compared with the mark you actually earn. The gap is `your total − the mark`, on the same 100-point scale.

Gap	**Adjustment**
within ±10	none — this is normal calibration
+11 to +20	−3
+21 to +30	−6
more than +30	−10
−21 or worse	−3 — read the rubric before you score yourself down
no `SELF_ASSESSMENT_REPORT.md`	−10, and the file-name total is ignored

A criterion you claim with no evidence line counts as claimed-and-not-done for this comparison. The adjustment never takes a submission below 0.

Scoring yourself honestly low costs you nothing inside ±10. Claiming marks you did not earn costs more than the marks would have been worth.
